FUTURE WORKS

TABLE OF CONTENTS

INTRODUCTION

INTRODUCTION - GOALS

EASE OF USE

Easy and fast to
deploy

ACCURACY

Reduce Fear

SCALABILITY

Update
deployment per
position

METHODS

DATA

EDA

MODEL

EVALUATE

DATA

- **API Call**
- **UNIX to DateTime**
- **JSON to DataFrame**
- **COVID-19 Excluded**

ARIMA MODEL

SPY ACF and PACF

- Steady ACF drop
- Sudden PACF drop at lag 2
 - AR order 2
- GridSearch
 - Determine I & MA
 - Convergence
 - Metric: RMSE

RESULTS - BEST

SPY Price ARIMA Order (2, 1, 1)

JPM Price ARIMA Order (2, 0, 2)

V Price ARIMA Order (2, 1, 1)

%RMSE > 1.6%

RESULTS - WORST

JNJ Price ARIMA Order (2, 1, 1)

GOOG Price ARIMA Order (2, 1, 1)

%RMSE > 3%

RESULTS ACHIEVEMENTS

FAST

Reduced
GridSearch
Parameters

ACCESSIBILITY

100% Open Source

ADAPTABLE

Easily scaled and
adapted

ACCURATE

Overall low RMSE

FUTURE WORKS

MORE MODELS

Regression with
NeUral Net,
RNN/LSTM

More Indices

VECTORIZE

Vector ARMA
(VARMA)

Simultaneous
Prediction

APPLICATION/LIBRARY

Deploy interactable
and scalable library
or application
